

YAWOSUP REPORT, JULY 2023

In our second quarter, we had planned to construct a house for a widow. We thank God for the support from WMT as our plan came to pass. A widow who had spent several years in a leaking hut had all the reasons to smile after a new house was built within a day with funds from WMT.

Having worked well in YAWOSUP farm, we expect to get a good harvest that will boost our feeding program. The harvest will be ready by September so we expect to get a boost in our feeding program in the third term from YAWOSUP farm.

Phase one.

Phase two

With funds from YAWOSUP WMT annual funding for the first quarter, we manage to do the first phase of YAWOSUP office which included wall, roof and floor construction. We give God all the glory and honor because the additional funds from WMT project funds enabled us to do phase two of the office construction. In Phase two, we did the partitions, electricity installation and doors fixing.

For many years we have been renting an office in shopping centres but since the construction of the the new office, we have been relieved from paying rent.

Apart from the projects, in this quarter we managed to improve the widows' microfinance project, pay our staffs including supporting Barbara Leighton Academy.

FUNDS ALLOCATION FOR SECOND DISBURSEMENT

1.A widow's house construction	85,000
2.Microfinance project	50,000
